

UFO ACTIVITY AT MOUNT RORAIMA

By Paul Dale Roberts, Halo Paranormal Investigations

Mount Roraima, located at the junction of the borders of Brazil, Venezuela, and Guyana in South America, is a very mysterious mountain.

The mountain is often referred to as a table top mountain or mesa, also known as a tepui in South America. The mountain looks like it is artificially created with a smooth flat top that reaches the clouds. The word tepui means “House of the Gods” in the language of the Pemon, the indigenous people who inhabit the Gran Sabana.

Looking at the mountain, it is the perfect spot for “the Gods” to land their extraterrestrial craft. One of my former clients, Sally Howard, brought this fabulous magical mountain to my attention with a recent post on Facebook. Thanks to Sally, I had to look more into it. Would a mountain like this attract UFOs? To my surprise, the answer is yes.

The Origins and Mystical Nature of Tepuis

Before I get into the sightings of UFOs around Mount Roraima, let’s talk more about tepuis. Tepuis are usually found as isolated natural structures and are not connected to other ranges. This allows them to become to unique varieties of plant and animal species.

Notable tepuis include Auyán-tepui, Autana, Neblina, and Mount Roraima. They are typically composed of sheer blocks of Precambrian quartz arenite sandstone that rise abruptly from the jungle. Auyán-tepui is also the source of Angel Falls, the world’s tallest waterfall.

These table top mountains are the remains of a large sandstone plateau that once covered the granite basement complex between the north border of the Amazon Basin and the Orinoco, between the Atlantic coast and the Rio Negro. This area is part of the remnants of the supercontinent called Gondwana.

Throughout the course of the history of Earth, the plateau began to erode and fragment about 300 million years ago, and about 70 million years ago the tepuis were

Mount Roraima, a mysterious table top mountain located at the junction of Brazil, Venezuela, and Guyana, is not only a geological wonder but also a hotspot for UFO sightings. It’s believed to be situated on ley lines and considered sacred by indigenous peoples.

formed from the remaining monadnocks, which are isolated rock hills, knobs, ridges, or small mountains that rises abruptly from a gently sloping or virtually level surrounding plain.

An example here in the U.S. would be Devils Tower National Monument in Wyoming. When our team's psychic medium Deanna Jaxine Stinson visited Devils Tower, she could see in her mind how a mother ship could easily land on top of this natural wonder. Deanna is from Montana and has talked with some Northern Plains indigenous peoples in Wyoming, and they consider Devils Tower a sacred site and suggest that this natural wonder is on a ley line.

UFO Sightings and the Mysterious Attraction of Mount Roraima

Mount Roraima is known for its high frequency of UFO sightings nearby and atop its plateaus. Tourists have reported seeing strange twirling lights hovering above or between Mount Roraima and Kukenam, another nearby tepui.

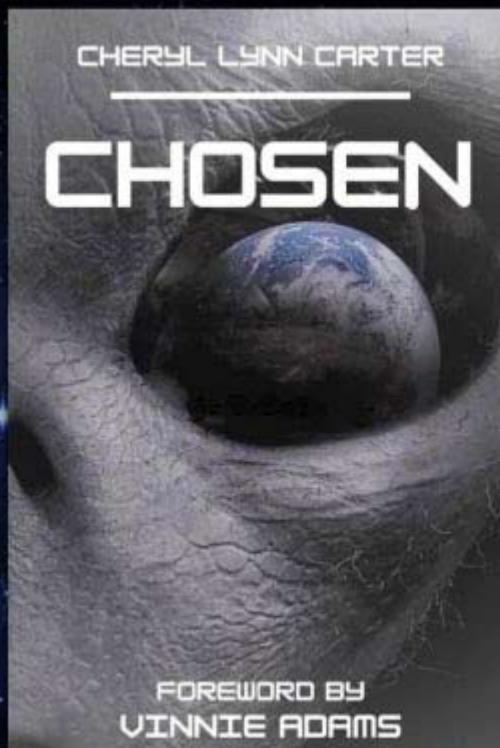

Paranormal enthusiast Katusca Briceno of Valencia, Venezuela, believes that the South American tepuis are all located on ley lines. Katusca says that his grandmother in 1954 saw a cigar-shaped UFO that was four miles in length and two miles in width land for a brief minute on Mount Roraima.

Mount Roraima's flat summit has drawn attention for its potential as a landing site for extraterrestrial craft, with numerous reports of strange lights and unexplained phenomena around the area.

Katusca's grandmother said the UFO was there, and then it wasn't there. I wonder if this cigar-shaped UFO had a cloaking device?

Why would UFOs be attracted to these tepuis? I believe because they are perfect as landing strips for UFOs and it's very possible that they are on ley lines, a perfect energy source for UFOs. ♦
